Langage AD Waste supply agreement.

Thank you for choosing Langage AD to dispose of your organic waste.

In order to help us maintain our high standards of operation and BSI: PAS110 and Anaerobic Digestion Resource Framework 2025 (ADRF), please take the time to go through our introductory material. Some of the documents within will need to be signed and returned ASAP before delivery can commence, while others are to simply provide information and make your lives easier when delivering to us for the first time.

Please print out pages 8 & 9 for the delivery driver's reference.

Please remember we accept non-Animal By-Product (ABP) material and CAT 3 ABP material only. Neither CAT 1 nor 2 ABP (accept CAT 2 digestive tract) is accepted on this site.

We hope your first delivery goes smoothly, though please do get in touch should you need help or have any questions.

Yours faithfully,

The Langage AD Team.

List of Accepted Wastes.

Please note, the following is a list of waste accepted under our EA Environmental Permit, BSI: PAS110 and ADRF 2025, ALL WASTE deliveries and EWC code must be agreed with Langage AD prior to delivery

Exclusions.

Wastes having any of the following characteristics shall not be accepted;

- Biodegradable wastes that are significantly contaminated with non-compostable or digestible contaminants, in particular plastic and litter shall be no more than 5% w/w and shall be as low as reasonably practicable by 31 December 2025.
- Waste containing wood-preserving agents or other biocides and post-consumer wood.
- Wastes containing persistent organic pollutants.
- Wastes containing Japanese Knotweed or other invasive plant species listed in the Invasive Alien Species (Enforcement and Permitting) Order 2019 (formerly the EU Invasive Alien Species Legislation).
- Pest invested waste.
- Manures, slurries and spoiled bedding and straw from farms where animals have a notifiable disease as stipulated in the Animal By-Products (Enforcement) (England) Regulations 2013

Wastes from agriculture, horticulture, aquaculture, forestry, hunting and fishing

Sludges from washing and cleaning 02 01 01

Restriction: Food processing waste and food washing waste only.

Animal tissue waste 02 01 02

Plant tissue waste 02 01 03

Including husks, cereal dust, waste animal feeds, off-cuts from vegetable and fruit and other vegetation waste.

Wastes from preparation & processing of meat, fish and other foods of animal origin

Sludges from washing and cleaning 02 02 01

Restriction: Process water and food washing waste only

Animal tissue waste 02 02 02

Including blood, animal flesh, fish processing waste, fish carcasses and poultry waste.

Materials unsuitable for consumption or processing 02 02 03

Sludges from on-site effluent treatment 02 02 04

Wastes from fruit, vegetables, cereals, edible oils, cocoa, coffee, tea and tobacco preparation and processing; conserve production, yeast and yeast extract production, molasses preparation and fermentation

Sludges from washing, cleaning, peeling, centrifuging and separation 02 03 01

Materials unsuitable for consumption or processing 02 03 04

Sludges from on-site effluent treatment 02 03 05

Wastes from sugar processing

Sludges from on-site effluent treatment 02 04 03

Wastes from dairy products industry

Materials unsuitable for consumption or processing 02 05 01

Including solid and liquid dairy products, milk, food processing wastes, yoghurt, and whey.

Sludges from on-site effluent treatment 02 05 02

Wastes from the baking and confectionary industry

Materials unsuitable for consumption or processing 02 06 01

Including condemned food, food processing wastes, biscuits, chocolate, yeast, bread, bakery wastes.

Sludges from on-site effluent treatment 02 06 03

Wastes from production of alcoholic and non-alcoholic beverages (except tea, coffee and cocoa)

Wastes from washing, cleaning and mechanical reduction of raw materials 02 07 01

- Including brewing waste, food processing waste, fermentation waste

Wastes from spirits distillation 02 07 02

Materials unsuitable for consumption or processing 02 07 04

Including brewing waste, food processing waste, fermentation waste, beer, alcoholic drinks and fruit juice

Sludges from on-site effluent treatment-sludges from the production of alcoholic and

Non-alcoholic beverages (except coffee, tea and cocoa). 02 07 05

Aqueous liquid wastes destined for off-site treatment

Untreated wash waters from cleaning fruit and vegetables 16 10 02

Milk and dairy waste from agricultural premises only 16 10 02

Liquor and leachate from a composting process that accepts input types 16 10 02 listed in this table

Wastes from physico/chemical treatments of waste

Premixed wastes composed only of non-hazardous wastes 19 02 03

Restriction: Acceptable only if derived solely from input types allowed by the ADRF 2025 and remains segregated from, and uncontaminated by, any other waste type.

Municipal wastes - Separately collected fractions

Restriction: Not allowed if any non-biodegradable coating or preserving substance present.

Biodegradable kitchen and canteen waste 20 01 08

Edible oil and fat 20 01 25

Garden and park wastes (including cemetery waste)

Biodegradable waste 20 02 01

Including animal faeces, manure, garden waste, green waste, horticulture waste, plant tissue, parks and garden waste, hedge and tree trimmings, grass cuttings and leafy materials.

Other municipal wastes

Waste from markets 20 03 02

- Restriction: Allowed only if source segregated biodegradable fractions. Examples are plant material, fruit and vegetables

- Restriction: Packaging waste from a market source is allowed only if it is otherwise allowed by the ADRF 2025.

New Waste Delivery Information.

Waste Transfer Note (WTN) Essentials

Each item on the following list must be included on a waste transfer note to satisfy the requirements of the Duty of Care Regulations. Each load delivered must have its own WTN.

Waste Hierarchy Declaration

Unique Waste Transfer Note number

Waste description and EWC/LoW code (European Waste Catalogue/List of Wastes) Delivery Vehicle registration number

Waste containment method

Haulier company name, address and contact details Waste Carriers License number

Disposal location address (minimum 'Langage AD, PL7 5AY') Date of waste transfer

Haulier signature and print name Receivers signature and print name

Document to be filled out in triplicate; 1 copy to be retained by premises of origin, 1 copy to be retained by transporter and 1 copy to be retained by premises of destination - all for 2 years.

****For waste containing Animal By-Products (ABP), additional information is required on the Waste Transfer Note to comply with Animal By-Products Regulations.**

Estimated weight

Waste source(s) with full address(es)

ABP Category declaration (only 'CAT 3' accepted)

Vehicles delivering CAT 3 ABP's must also clearly display a sign stating;

“Food Waste CAT 3 Animal By-Product - Not for Human Consumption “

A print out of this sign is included in this document (page 6). Hauliers delivering ABP wastes must be registered as ABP carriers with Animal and Plant Health Agency (APHA). An Animal Health officer inspects Langage AD on a quarterly basis - should any document not contain all required information, as a standard course of action APHA will enquire into any non-compliance issue further.

Season Tickets.

Where a single waste stream is delivered, a supplier may opt to produce a single 'season ticket' to cover all deliveries over a year. Please contact us for more information if you wish to produce a season ticket. Please note ABP CAT 3 wastes must have their ABP paperwork requirements uniquely with each load. This is easily achieved with a 'run sheet' with all addresses listed.

Contamination.

Langage AD specialise in de-packaging food wastes. However, suppliers will be subject to additional charges or have loads rejected if large items of contamination are discovered and removed from delivered wastes. Any suspected chemical contamination such as detergents, bleaches, antibacterial agents, strong acid/bases etc. within the waste must be declared prior to delivery. Undeclared chemical contamination causing damage to the facility's biological process will be subject to additional charges and rejection of further loads. Samples of waste may be requested prior to delivery.

Delivery.

Deliveries must be made in sealed, fit for purpose vehicles. Vehicles should not be leaking or emanating odours. All waste delivery vehicles must be registered with a Waste Carriers License. Hauliers delivering ABP wastes must be registered as ABP carriers with APHA. Site traffic is speed limited to 5 miles per hour.

The responsibility for the quality control of the waste supplied remains with the supplier. The plant operator reserves the right to reject any load or part load that fails to meet the agreed criteria. Langage AD reserve the right to impose additional charges for the removal and disposal of contaminants. The supplier must inform the plant operator of any significant change in the quality of the input material, affecting the fitness for purpose, before delivery. This is a requirement of the site BSI: PAS110:2014 Biofertiliser Certification (i) and ADRF 2025.

Signing below confirms waste supplied will be fit for purpose and in accordance with the agreed terms, deliveries will be made in accordance with the stated terms relating to routes, vehicle types, paperwork requirements and tipping procedures, and relevant information here contained is passed to the responsible delivery drivers. A 1-ton minimum charge applies to all loads.

DELIVERY INFORMATION FOR DRIVERS.

All arriving loads:

If arriving from the WEST on the A38 please **ONLY** use route below.

If departing to the A38 EASTBOUND please **ONLY** use route below.

| <i>Langage Farm AD</i> | | <i>Waste Supply Agreement</i> | |
|------------------------|--------------|-------------------------------|-------------|

WASTE DELIVERY PROCEDURE.

1. Enter through right hand gate signed 'LANGAGE AD' (entry/exit) and pull up on the weighbridge. Be wary of pedestrians.
2. On arrival, produce a valid Waste Transfer Note at the weighbridge window (loads notable to do so will be turned away).
3. Weigh in, typically with driver out of the cab.
4. Await load inspection and notification of acceptance or refusal of load by Langage AD operator.
5. If load is accepted, enter waste reception hall on foot to open the main vehicle entry door - switch is located to the left-hand side of door.
6. Reverse into reception hall, taking care of operators. There is a large waste reception pit at the end of the hall runway - a door and wheel stops are in place.
7. Close the main reception hall door behind you before opening the reception pit door.
8. Tip waste into reception pit.
9. Wheel and vessel washing facility is available once loads are tipped and pit door has been closed.
10. Proceed from waste reception hall to weighbridge and return to shut the main door.
11. Weigh out and complete waste transfer documentation before site is vacated. DO NOT REMOVE PAPERWORK FROM AN UNATTENDED WEIGHBRIDGE OFFICE.

NB: Langage AD is a strictly no-smoking facility.
